

[illegible]

Diagram illustrating a fuel cell assembly 100. The assembly includes a cathode 110, an anode 120, and an electrolyte 130. A membrane 140 is positioned between the cathode and the anode. The cathode and anode are connected to an interconnect 150. The assembly is supported by a base 160. Arrows indicate the current flow from the cathode to the anode. Labels 200, 202, 210, 212, 280, and 290 point to various components of the assembly.
